Quick Screen Recorder (LifeTime) Activation Code

Fade to Black is a simple screen recording utility that allows you to capture screenshots of your desktop and share them with your contacts via instant messaging or email. All you need to do to get started is to press the "Start Screen Recorder" icon, watch the interface for all action, and finish recording. The tool doesn't require any software prerequisites. Besides, the interface and functionality is very simple, so you can easily configure how long the recording will take and switch to other applications. When you're ready, you may share your screen on the fly with one click. Once the task is done, you are given the chance to adjust settings like the compression rate, sound level, as well as the quality mode. You are also allowed to view a log file that lists all activities performed so far. The utility comes in handy if you want to get a backup copy of your desktop or need to create presentation that will depict your desktop with a logo or even a slogan. Clean looks Fade to Black doesn't require you to have any prior computer knowledge. You will learn how to start and stop a recording session within seconds. The application is packed with a minimalistic look that does not interfere with your workflow. You get what you ask for. If you need assistance with the tool, you can always log in on your forum account where you can also find a help manual, as well as a database of themes. Fade to Black does not hog all the system resources, so it won't cause any errors or system slowdown. You can have all the power you can handle. Recorder can be used with and without hardware acceleration. You may also choose between two different audio modes (no audio, error beep, fall back to speakers), set custom sound level, as well as select a different frequency option (50, 60 or 75 Hz). Over and above that, the software can create videos with a maximum size of 1024x768. Final remarks MakeScreenshot displays a clean, innovative user interface where all options are well-structured. You can easily start a recording session by pressing the "Start Screen Recorder" button. Besides, the interface is packed with navigation options and tool tips (dotted underlines) for guidance. The process is even simpler if you use a predefined theme. A simple configuration panel makes it possible to adjust the total recording time, as well as select the sound level, encoder mode and wave file
